# New York Stock Warket

NEW YORK, November 12,-The singlish current of the price-movement in the stock market to-day shifted in consonance with the varying view of the money situation. Supplies of money on call at 5 per cent, and below during the earlier part of the day gave considence that the banks were within their reserve limit, so that call money borrowers would not be pushed for payment. Later the appearance of the preliminary estimates of the week's currency movement and announcement of further engagements of gold for export renewed anxiety, and the call money rate stiffened again.

The rise in money rates applied not only to call loans, but to time loans, and the hardening tendency extended from the short to some of the longer periods. Asking rates for ninety-day loans were advanced a fraction during the day. A feature of the narrow speculation was its diversion to low-priced stocks, both industrials and railroads.

Stocks fell to the lowest of the day when call loans rose to 6 per cent, and then hardened when the rate eased off. Bends were steady. Total sales, par value, \$3.680.600. United States bonds were unchanged on call.

To-day sales of stocks to-day were 674,300 shares.
